PROJECTS

VISITOR MANAGEMENT SYSTEM (<https://vms-2.vercel.app/>)

Visitor management is any process that helps an organization keep track of the people that visit their location. Improves the safety at your workplace .Ensures you have control over who enters your premises. Makes a good and professional first impression on visitors. It is a software designed to help modern organizations manage people coming to their offices, who could be contractors, VIP guests, or delivery men

Technologies used: HTML, CSS, JavaScript, React JS.

E-COMMERCE WEBSITE (<https://zinggy-clone.vercel.app/>)

An ecommerce website is your digital storefront on the internet. It facilitates the transaction between a buyer and seller. It is the virtual space where you showcase products, and online customers make selections. On an E-Commerce website, you'll find product listings, E-Commerce blog content, company history, and contact information.

Technologies used: HTML, CSS, JavaScript, React JS.

RESPONSIBILITIES

- Converted design mock-ups from Adobe XD into functional, responsive web pages using HTML, CSS, and JavaScript.
- Implemented responsive design principles ensuring optimal display on desktops, tablets, and mobile devices.
- Created dynamic UI elements such as sliders and modals, and built user input forms with client-side validation.
- Optimized code and assets to improve website load times and overall performance.
- Developed interactive web applications using React and integrated APIs for dynamic content.
- Managed code versions with Git, collaborating with other developers.
- Collaborated with UI/UX designers and back-end developers to align on project goals and technical requirements.
- Conducted cross-device and cross-browser testing, debugging, and resolved issues.
- Ensured compliance with web accessibility standards and implemented SEO best practices.
- Stayed updated with the latest industry trends and continuously enhanced technical skills.
